Project: Cloud Infrastructure Migration

We seek proposals for migrating our on-premise infrastructure to cloud:

Scope of Work:

1. Assessment of current IT infrastructure (50 servers, 200 VMs)
2. Design cloud architecture on AWS or Azure
3. Migration of production workloads to cloud infrastructure
4. Implementation of cybersecurity measures and compliance controls
5. Setup of monitoring, logging, and alerting (DevOps tooling)
6. Data center decommissioning support

Technical Requirements:

- SaaS application hosting capability
- Database migration (Oracle to cloud-native)
- Network architecture with VPN connectivity
- Disaster recovery and backup solutions

Timeline: 12 months

Budget range: \$500K - \$1M
